

Reef Neighbors

Of all of Earth's ecosystems, coral reefs have one of the highest biodiversities; that means more different species live there than almost anywhere else. The warm waters and bright sunshine mean that many animals can survive there, and the coral reefs provide shelter for these animals to live and hide. Can you find the 15 reef-related words listed below?

L	X	Y	Z	F	G	P	L	A	N	K	T	O	N	Z
